# Kofi Mensah

kofi.mensah@example.com · (617) 555-0199 · Boston, MA · github.com/kofimensah

## EDUCATION

**B.S. Computer Engineering, Northeastern University** **Expected May 2026**

Relevant coursework: Data Structures, Operating Systems, Machine Learning, Databases

## PROJECTS

**StudyBuddy – Course Planning App** **2025**

- Built a Next.js and PostgreSQL app that helps 600 students plan course schedules.
- Implemented authentication with OAuth and role-based access for teaching assistants.

**Campus Air Quality Monitor** **2024**

- Designed sensor firmware in C++ and a Python dashboard tracking air quality across 12 buildings.
- Trained a scikit-learn model that predicts pollution spikes with 87% accuracy.

**Ray Tracer in Rust** **2023**

- Wrote a multithreaded ray tracer in Rust rendering scenes four times faster than a single-threaded version.

## TECHNICAL SKILLS

Languages: Python, TypeScript, C++, Rust, SQL

Frameworks: React, Next.js, Flask, scikit-learn

Tools: Git, Docker, Linux

## ACTIVITIES

Teaching Assistant, Introduction to Programming (2024 – 2025)

Member, Robotics Club
